The focus of the conference is on social inclusion of disadvantaged mobile young people through informal and non-formal education. Effective education of displaced, disadvantaged, and marginalized young populations should be based on informal and non-formal learning models that add to formal education and stand on the values of mutual acceptance and understanding, intercultural sensitivity, solidarity, cooperativeness, and on the right to cultural and linguistic diversity. Exploring the differences as well as the similarities between countries and localities and how young people experience and deal with their own situation, culture, work and education lie at the heart of this conference.
